

THE CHANTRY CENTRE ANDOVER

Client: AXA IM Real Assets

Contract Value: £900,000.00

Duration: 16 weeks

Refurbishment of six main entrances and the external facades of a live shopping centre. Including design, construction and installation of steel framed timber clad façade panels, atriums and entrance canopies. New entrance doors, electrical installation and new roof coverings.

Creative Construction were commissioned by AXA to design and build new entrance canopies and façade paneling to six entrances and all main facades working alongside architects Child Graddon Lewis. The tired dilapidated facades and entrances were in need of refurbishment. Due to the requirement of the shopping centre remaining live, careful thought, consideration and planning were required to overcome the intricate and complex entrances and façade panels from conception through to delivery of the project.

This bespoke, refurbishment included design, construction and installation of steel framed timber clad façade panels, atriums and entrance canopies with integrated feature lighting, New entrance doors, electrical installation, New illuminated signage and new roof coverings.
